The use of cost-effectiveness analysis in plastic surgery clinical research: Challenges and opportunities

Dr. Achilles Thoma
MD MSc FRCS (C) FACS

Wednesday June 19, 2013 at 11 a.m.
CRL B119

Topic: Dr. Achilleas Thoma will draw from research studies to discuss the present state of the use of cost-effectiveness analysis in plastic surgery, the weaknesses of the published studies, the obstacles that plastic surgery is facing in adopting correct methodology and suggest some possible solutions.

Biography: Dr. Achilleas Thoma is a clinical professor in the division of plastic surgery, Department of Surgery and an associate member of the Department of Clinical Epidemiology at McMaster. His research interests include evidence-based surgery, cost-effectiveness analyses and mapping utilities, and health-related quality of life in patients who undergo plastic surgery procedures.
