Surveying the childhood disability research landscape: Bumps in the road separate researchers from patients

Presenter: Dr. Matthew Purser, PGY2
Supervisor: Dr. Peter Rosenbaum

Summary: This study will examine the current landscape of childhood disability research by reviewing abstracts submitted to the largest international conference on childhood disability, and categorizing their themes based on the International Classification of Functioning, Disability and Health (ICF) framework.

Presentation Objectives:

i) Outline the ICF framework as it applies to this study
ii) Review the study design and results
iii) Discuss internal quality control measures

The MacPEDS Resident Research Tracking Tool

Presenter: Dr. Lucy Giglia

This session will be of great interest to programme directors, educators, research supervisors and mentors! Dr. Giglia will introduce a new tool designed to help learners carry out a successful research project. Join us to share your experiences in supporting learners in their research journey.

This session will:
1) familiarize faculty and learners with the electronic MacPEDs Resident Research Tracking Tool
2) encourage participants to share their experience with:
   - coordinating learner research
   - accessing resources for learners
   - providing support for faculty.supervisors mentoring learners

All faculty, research staff, allied health staff, and trainees are welcome to attend.
*These are interactive sessions - we want to hear your feedback, questions and great ideas!*
