Interventional Radiologist Opportunity

Posted –
September 18, 2017

St. Joseph’s Healthcare Hamilton (SJHH) seeks a Fellowship trained Interventional Radiologist to join our team of 18 radiologists. This is a permanent, full-time replacement position. The successful candidate will enhance the service provided by our Centre for Interventional Radiology and Oncology (CiRO).

The successful candidate will participate in a multidisciplinary team environment and contribute strongly to the academic program, which includes resident and fellow education and research. Interested candidates should have completed a minimum one-year dedicated interventional radiology fellowship and be proficient in performing a full range of interventional radiological procedures. The candidate will participate in a 1:3 acute on-call roster covering interventional radiology only. The successful candidate will also perform diagnostic imaging within the hospital or associated clinics.

St. Joseph’s Healthcare is a multi-site, acute-care 740-bed teaching hospital in Hamilton, Ontario, Canada. Affiliated with McMaster University, Faculty of Health Sciences, St. Joseph’s Healthcare operates as the Regional Referral Centre for Thoracic Surgery, Head and Neck Surgery, Respirology, Nephrology, Hemodialysis and Renal Transplantation, Colorectal Surgery, Urology Cancer and Bariatric Surgery.

A variety of procedures are performed predominantly biopsies, drainages, dialysis related interventions, embolization and tumour ablation. We value our strong clinical relationships with our colleagues and plan to maintain and enhance IR support for these areas in the future.

CiRO has 2 interventional rooms with the recent installation of a state-of-the-art angio suite. There is a dedicated 5bed recovery area adjacent to the interventional rooms. The program also has an “IR out-patient clinic” service and the successful candidate is expected to contribute to this service.

Our Diagnostic Imaging Department provides two 1.5T MRI scanners and one 3T MRI scanner in addition to two multi-slice CT scanners. We have a busy ultrasound department with 7 ultrasound units. Research facilities at SJHH include the Imaging Research Centre with a dedicated 3T research magnet and CT PET.

Hamilton is a major academic and cultural centre lying between the shores of Lake Ontario and the Niagara Escarpment. The ethnic diversity of the city is reflected in its galleries, shops, villages & dining establishments. Hamilton is home to many festivals, concerts, sports events and its world-renowned trails and conservation areas provide opportunities for cycling and hiking. It is a safe, family-oriented community with a reasonable cost of living.

Successful candidates must be eligible for Ontario Licensure, hold a Royal College Certification in Diagnostic Radiology or equivalent, have completed a minimum 12-month dedicated interventional imaging fellowship. An appointment with McMaster University will be given at an appropriate rank according to experience. All qualified applicants are invited to apply; however, we are obliged to give candidates who are Canadian citizens or permanent residents of Canada priority.

We offer a very competitive compensation package and lifestyle. This is a permanent, full-time post with a first-year salary of $400,000. If you are interested in joining our innovative imaging team, please forward your current CV and Personal Statement of Goals to:
