DEPARTMENT OF RADIOLOGY

VISITING PROFESSOR

Dr. Alice Gillams, M.D.
Senior Lecturer, Medical Imaging
University College Hospital, London

“Current Status of Ablation in the Liver,
Kidney, Lung and Bone”

DATE: Tuesday, March 3, 2009
TIME: 6:00 p.m.
PLACE: Michael DeGroote Centre for Learning,
McMaster University, Room 3020

Objectives:

1. To provide a general overview of the clinical role of ablation in the various organs and tumour biologies.

2. To provide an overview of the relative roles and interaction between chemotherapy, surgery, and ablation in the treatment of colorectal liver metastases with the emphasis on recent developments.

3. To discuss MR techniques in the pancreas including secretin MR, with illustrations from a range of pathologies with particular emphasis on pancreatitis.

All of these lectures will be available for webcast viewing @
