Dear colleagues,

Please find below this week’s updates:

- The **Department of Medicine now has a Twitter feed.** The handle is @MacDeptMed. Please feel free to forward information you would like included in the feed to Sara Sellers at sellers@mcmaster.ca. In particular, we are interested in recent news items and links to recent publications. We will do our best to share all information we receive on the feed. We will also use information from the feed to inform the Friday updates.

The Department is formulating a social media program which is a necessary part of successful business in 2017. This will include an update of our website, development of a comprehensive IT strategy for the administrative staff and a so curated social media presence. A committee to examine this issue has been struck and I look forward to reporting back to you in 2018 with respect to the specifics of the strategy.

- Attached is an invitation for this year’s **Community of Distinction induction ceremony** on Friday November 3rd. We will be honouring three inductees this year; Dr. Maureen Andrew, Dr. Brian Haynes and Dr. Geoff Norman. Should you have any questions, please contact myself or Betty Chung chungb@mcmaster.ca.

- The **Canadian Space Agency (CSA), in partnership with the National Research Council Canada Industrial Research Assistance Program (NRC IRAP),** invites you to an information session on supporting the health and performance of astronauts during deep space missions, including space exploration medical capabilities and synergies with technology development and research that address similar terrestrial health challenges. You will also hear from companies and researchers who have experience developing technologies and conducting research for space, and learn about potential opportunities to play a role in support of astronaut healthcare and performance in future deep space manned exploration missions. The Toronto seminar is taking place on October 26, 2017, 08:00-12:30, MaRS Discovery District.

If you have expertise in technology development and research related to any of the following areas, we invite you to attend our information session:
Please note that this is not an exhaustive list and experts in other relevant areas are also invited to attend.

To learn more and to apply to participate in an information session, please visit http://www.asc-csa.gc.ca/eng/events/2017/planning-canada-next-chapter-human-space-exploration-health-and-biomedical-roles.asp. Due to limited space, the CSA will review all requests to participate and follow-up with a formal invitation and meeting details. If you have any questions, please email us at asc.santespatiale-spacehealth.csa@canada.ca.

On behalf of Dr. Jonathan Bramson, Associate Dean (Research), in an effort to improve our success rate with CIHR, he would like to schedule a de-brief with all individuals who are participating in the Fall Project Scheme review. If you are serving as a reviewer, SO or Chair for the review, please identify yourself to Jennifer Raymond in Health Research Services at raymoj5@mcmaster.ca. He would like to schedule the de-brief in December while the experiences are fresh in our minds.

Please find attached the schedule of Continuing Health Sciences Education (CHSE) monthly events. Further information on these events can be found at www.fhs.mcmaster.ca/conted

Attached is a copy of the October 13 HRS Funding Opportunities Bulletin.

Please join us at Grand Rounds next week on October 19, 2017 at 8:00 am. Chair’s Grand Rounds will be hosting Dr. Vinai Bhagirath in MUMC 4E20 who will be speaking on Measurement and interpretation of direct-acting oral anticoagulant (DOAC) drug activity – practical issues. Medical Grand Rounds-SJH will be hosting Dr. Michael Fralick
in the SJH Miller Amphitheatre who will be speaking on *SGLT2 inhibitors: basics, bad stuff, and big data*. Further information on these events, and many others taking place in the Department, can be found in the [ETA Calendar](#).

- **New Faculty Highlight**

  ![Dr. Erick Duan](image)

  Welcome to Dr. Erick Duan who joined the Department of Medicine, and the Division of Critical Care, on July 1, 2017 as an Assistant Professor. Dr. Duan’s research interests include understanding patterns in the management of ARDS, and the epidemiology, outcomes and treatment of *Clostridium difficile* infection in the intensive care unit.

If you have anything you would like to share with your colleagues, please submit it to Sara Sellers at [sellers@mcmaster.ca](mailto:sellers@mcmaster.ca)

Mark A. Crowther  
Professor and Chair, Department of Medicine
Your Invitation to...

Community of Distinction

Maureen Andrew, MD  R. Brian Haynes, MD, PhD  Geoff Norman, PhD

---

Paul O’Byrne, MB
Dean and Vice-President
Faculty of Health Sciences

invites you to the celebration of the new members of the Faculty of Health Sciences Community of Distinction

Friday, November 3, 2017
4 p.m. - 6 p.m.

Ewart Angus Centre
Health Sciences Centre
(Purple Section – 1st Floor)
McMaster University

Reception to follow

Please RSVP by
Friday, October 27, 2017
to 905.525.9140 ext. 27452
or e-mail: fhsevents3@mcmaster.ca
The Canadian Space Agency is organizing an information session on supporting the health and performance of astronauts during future deep-space missions.

Subjects will include medical capabilities in space and synergies with technology development and research that address similar health challenges on Earth.

To register and learn more

In collaboration with:

2018 ACTIVITIES AT A GLANCE

SPRING

MARCH
21-23  10th McMaster University Review Course in Internal Medicine
      Hamilton Convention Centre By Carmen’s,
      1 Summers Lane, Hamilton, ON

APRIL
13  Day in Endocrinology for Primary Care Providers
    Liuna Station,
    360 James Street North, Hamilton, ON
20  14th Annual Canadian Endocrine update (CEU) Scientific Meeting
    Holiday Inn Burlington Hotel
    & Conference Centre
    3063 South Service Rd, Burlington

MAY
5  36th Annual CAN-AM Anesthesia Conference
    Niagara Fallsview Resort
    6380 Fallsview Boulevard,
    Niagara Falls, ON
10-12  4th McMaster International Review Course in Internal Medicine
       Krakow, Poland
11  McMaster Venous Symposium: The Contemporary Management of Venous Disease and Disorders
    Sheraton Hamilton Hotel
    116 King Street West, Hamilton, ON

JUNE
6  9th Annual Care of the Elderly
    Liuna Station,
    360 James Street North, Hamilton, ON
13-15  3 Days in Palliative Care
       Royal Botanical Gardens
       680 Plains Road West, Burlington, ON
16  The Dr. Paul Stringer Memorial Lectureship: Clinical Day in Ophthalmology 2017
    Queen’s Landing
    155 Byron Street, Niagara-on-the-Lake, ON
22  Infectious Diseases
    Liuna Station,
    360 James Street North, Hamilton, ON
News & Events

*NEW* Canadian Network for Human health and the Environment, Webinar with the Chemicals Management Plan (CMP):
National Human Biomonitoring Programs

In collaboration with Health Canada, the Canadian Network for Human Health and the Environment (CNHHE) is hosting a teleconference/webinar on **Thursday, October 26, 1:00pm (EDT)** to present an overview of national human biomonitoring programs carried out under the Chemicals Management Plan (CMP). The focus will be on the biomonitoring component of the Canadian Health Measures Survey (CHMS), the Maternal-Infant Research on Environmental Chemicals (MIREC), and the Northern Contaminants Program (NCP) and how the data are used under the Chemicals Management Plan (CMP).

We invite you to take advantage of this opportunity to learn about these programs and discuss the achievements, how the findings are used, and most importantly for the CHMS, how you can access and use the data in your own work.

Once again, this session is intended for a wide range of health and environment stakeholders, including, but not limited to NGOs, indigenous groups, researchers, health workers, and policy-makers.

The session will include the opportunity to discuss this subject with CHMS, MIREC, NCP and CMP staff.

Please reply as soon as possible if you are interested in participating, along with your language preference for materials (English/French).

---

### Health Research Grant Competitions

CIHR – Postdoctoral Fellowship Award Competition: 2017-2018

Fellowships provide support for highly qualified candidates in all areas of health research at the post-PhD degree or post-health professional degree stages to add to their experience by engaging in health research either in Canada or abroad.

**Funding Details:** The maximum amount awarded for a single award is up to $60,000 per annum for up to 5 years.

**Additional Details**
Contact Correen Smith in Graduate Studies to Apply
Sponsor Deadline: November 1, 2017

CIHR – Doctoral Research Award: Vanier Canada Graduate Scholarships (2017-2018)

The Vanier Canada Graduate Scholarship (Vanier CGS) was created to attract and retain world-class doctoral students and to establish Canada as a global centre of excellence in research and higher learning. It is available to both Canadian and international PhD students studying at Canadian universities.

The program is jointly administered by Canada’s three federal granting agencies: the Canadian Institutes of Health Research (CIHR), the Natural Sciences and Engineering Research Council (NSERC) and the Social Sciences and Humanities Research Council (SSHRC).

CIHR has been designated as the operational lead for the implementation of the program.

**Funding Details:** The total amount for this funding opportunity is $24,900,000, enough to fund approximately 166 awards. The maximum amount per award is $50,000 per year for 3 years. This funding is non-renewable.

**Additional Details**
Contact Correen Smith in Graduate Studies to Apply
Sponsor Deadline: November 1, 2017

CIHR – Fellowship: 2017-2018

Fellowships provide support for highly qualified applicants in all areas of health research at the post-PhD degree or post-health professional degree stages to add to their experience by engaging in health research either in Canada or abroad.

The specific objectives of this funding opportunity are:
- To provide recognition and funding to academic researchers;
- To provide a reliable supply of highly skilled and qualified researchers.

**Funding Details:** The maximum amount awarded for a single award is up to $60,000 per annum for up to 5 years. The value and duration of each award is determined by the degree(s) held, licensure (where applicable), location of tenure and experience of the applicant.

**Additional Details**
Contact Correen Smith in Graduate Studies to Apply
Sponsor Deadline: November 1, 2017

CIHR – Fellowship: Fall 2017 Priority Announcement (Specific Research Areas)

The specific objective of the Fellowship Priority Announcement (Specific Research Areas) is to offer additional sources of funding for highly rated applications that are relevant to specific CIHR research priority areas and mandates. Funds are available to encourage and support applications in specific areas that are aligned with CIHR's research priority areas and mandates.

**CIHR Research Priority Areas**
- Clinical Nutrition
- Diabetes
- Gastroenterology
- HIV/AIDS
- Research in First Nations, Métis and/or Inuit Health
Funding Details: The total amount available for this funding opportunity is $600,000, enough to fund approximately two (2) awards. This amount may increase if additional funding partners or internal collaborators decide to participate. The maximum amount awarded for a single award is $60,000 per annum for up to five (5) years.

Additional Details
Contact Correen Smith in Graduate Studies to Apply
Sponsor Deadline: November 1, 2017

CIHR – Healthy and Productive Work – Partnership Grants
Building on the Partnership Development Grant phase, the specific objectives of Phase 2: Healthy and Productive Work (HPW) Partnership Grants are:

Through formal partnerships and stakeholder engagement:
1. Develop evidence about interventions that enable healthy and productive work using methods that integrate the health and social sciences and humanities fields.
2. Develop evidence-informed approaches and mechanisms for effective implementation, evaluation and scaling up of interventions that enable healthy and productive work.
3. Build capacity and infrastructure for measuring and demonstrating the broader health and economic impacts of these interventions and policies.
4. Expand the evidence base and research capacity in the integration of sex and gender-based analysis with respect to healthy and productive work—from research design to intervention development, implementation, evaluation and scale-up, as well as the evaluation of eventual health and economic impacts.
5. Develop the next generation of researchers focused on healthy and productive work through engagement of trainees in high quality projects.

Funding Details: The total amount available for Phase 2 is $11,400,000, enough to fund approximately 8 Partnership Grants. The maximum amount per grant is $325,000 per year for up to 4 years.
- Each grant will be jointly funded by SSHRC and CIHR. The maximum annual investment per project will be $200,000 from CIHR and $125,000 from SSHRC.
- An additional fifth year valued at up to $125,000 for connection activities (e.g., workshops, colloquiums, conferences, forums or other events or outreach activities) is also available from SSHRC’s allocations.

Additional Details
Internal HRS Deadline: October 18, 2017
Sponsor Deadline: November 1, 2017

CIHR – Catalyst Grant: Sex as a Variable in Biomedical Research
The specific objectives of this funding opportunity are:
- To add value to the current state of basic biomedical knowledge on a given topic that has potential to, but has not yet fully elucidated, the impact of sex on biological mechanisms or pathophysiology.
- To promote increased awareness, knowledge and self-efficacy among biomedical researchers regarding the integration of sex as a variable in their research.
- To contribute to the improvement of women and men’s health in Canada and the world.

Funding Details: The total amount available for this funding opportunity is $3,450,000, enough to fund approximately 23 grants. The maximum amount per grant is $75,000 per year for up to 2 years. This funding is non-renewable.

Additional Details
Internal HRS Deadline: October 24, 2017
Sponsor Deadline: November 7, 2017

The Strategy for Patient-Oriented Research (SPOR) Collaboration Grants are expected to catalyze patient-oriented research that aligns with the SPOR Capacity Development Framework and the SPOR Patient Engagement Framework by:
Building capacity in Canada’s health system for patient-oriented research through projects conducted by teams comprised of researchers, patients, health care professionals and/or policy-makers; and,
Increasing the number of new/early career investigators meaningfully involved in patient-oriented research by integrating them in patient-oriented research teams.

**Funding Details:** The total amount available for this funding opportunity is $1,600,000, enough to fund approximately 40 grants. The maximum amount per grant is $40,000 per year for up to one year.

**Additional Details**

Internal HRS Deadline: **October 31, 2017**
Sponsor Deadline: **November 14, 2017**

**CIHR – Operating Grant: SPOR iCT Rewarding Success**

The Rewarding Success Initiative is an experimental funding model that is being piloted in five provinces: Alberta, British Columbia, Manitoba, Newfoundland & Labrador, and Saskatchewan. The Rewarding Success Initiative is similar to other funding models that have been developed to support innovation and impact such as risk sharing, social impact bonds, and innovation prizes. The basic principle is that teams of patients, healthcare delivery organizations, clinicians, and researchers identify potential solutions to identified problems and priorities in health care; solutions that will enhance patient and provider experience while also:

- reducing low value health care (e.g. unnecessary diagnostic tests/drugs), and/or
- addressing health care inefficiencies (e.g. wait lists), and/or
- reducing avoidable morbidity (e.g. stroke)

**Funding Details:** The total amount available for this funding opportunity is $1,050,000.

- Phase 1 - Idea Brief: The total amount available for this phase of the initiative is $50,000, enough to fund approximately 20 travel awards, up to four (4) per participating province. The maximum amount per travel award is $2,500.
- Phase 2 – Ideathon: The total amount available for this phase of the initiative is $1,000,000, enough to fund approximately ten (10) grants, up to two (2) per participating province, for the duration of one (1) year. The maximum amount per grant is $100,000.

**Additional Details**

Internal HRS Deadline: **November 7, 2017**
Sponsor Deadline: **November 21, 2017**

**CIHR – Operating Grant: Economic Forecasting**

The objective of the Economic Forecasting funding opportunity is to:

- Advance knowledge in health economic forecasting of the cost of primary and secondary prevention, and early intervention services.
- Build capacity to produce financial projections that would more easily allow government departments to understand the impact of scaling evidence-based primary and secondary prevention interventions on their budgets over time.

**Funding Details:** The total amount available for this funding opportunity is $265,000, enough to fund approximately one grant for up to one year. Of this amount:

- The J.W. McConnell Family Foundation will contribute up to $90,000;
- CIHR-ISHPR will contribute $116,700; and
- CIHR-IHDCYH will contribute $58,300.

**Additional Details**

Internal HRS Deadline: **November 14, 2017**
Sponsor Deadline: **November 28, 2017**

**CIHR – Operating Grant: Secondary Data Analysis for Cancer Prevention and Control**

The specific objective of this funding opportunity is to support projects that have the potential to significantly advance our understanding of cancer prevention and cancer control through the analysis of existing National or International large cohorts and/or administrative datasets specific to one of the three research areas above. Such projects/analyses could lead to the identifications of prevention and treatment interventions, programs or protocols which contribute to the improvement of care and the reduction of morbidity and mortality.
Funding Details: The total amount available for this funding opportunity is $1,000,000 enough to fund approximately ten (10) grants. The initial amount per grant is $75,000 for up to 1 year. Of this $1,000,000:

- $250,000 will be dedicated for a possible additional amount of up to $25,000 per grant for biologic sample analysis from the cohorts, for a maximum grant value of $100,000. The biological sample analysis may only occur with an existing repository and established database with sample data (not on newly collected samples). A justification will be required to have access to these additional funds.
- In considering the initial $750,000 for the 10 grants:
  - $150,000 is available to fund two (2) grants relevant to breast cancer.
  - $600,000 is available to fund eight (8) grants relevant to all other cancers.
- If there are no fundable applications in the breast cancer funding pool, the funds will be transferred to the other pool.

CIHR – Master’s Award: 2017-2018 Frederick Banting and Charles Best Canada Graduate Scholarships
The Canada Graduate Scholarships Master's Awards are intended to provide special recognition and support to students who are pursuing a Master's degree in a health related field at a Canadian institution. These candidates are expected to have an exceptionally high potential for future research achievement and productivity.
Some Canada Graduate Scholarship recipients may be considered for the honour of having their scholarship named a "Canada Graduate Scholarship to Honour Nelson Mandela," should CIHR deem their application to be aligned with at least one of five themes championed by Mandela: national unity; democracy; freedom and human rights; leadership; children's participation in society; and children's health.

Funding Details: The total amount available for this funding opportunity is $7M, enough to fund approximately 400 awards.

Sponsor Deadline: December 1, 2017

CIHR – Operating Grant: Opioid Crisis Knowledge Synthesis
This Funding Opportunity is expected to:
- Address the pressing evidence needs of knowledge users within one or more pillars of the CDSS.
- Increase the application of knowledge related to one or more pillars of the CDSS in policy and decision-making, in order to address the most urgent elements of the opioid crisis, including opioid-related mortality rates.
- Encourage syntheses that consider sub-populations and/or the biological and social determinants of problematic opioid use.

Funding Details: The total amount available for this funding opportunity is $1,850,000.
- The maximum amount per grant is $110,000 for up to 6 months ($100,000 for knowledge synthesis, $10,000 to facilitate knowledge translation, such as for an end-of-grant knowledge exchange).
- The maximum amount for a scoping review is $60,000 for up to 6 months ($50,000 for the scoping review, $10,000 to facilitate knowledge translation, such as for an end-of-grant knowledge exchange).

HHS JHCCF Fall 2017 Research Grant
Juravinski Hospital and Cancer Centre Foundation’s (JHCCF) main purpose is to champion and advance the vision and mandate of the Juravinski Cancer Program (JCP). As part of its commitment to research, the Foundation sponsors a Research Grant Program that awards funding through a rigorous peer reviewed application process, once or twice yearly. To be eligible, the principal investigator or co-principal investigator must work at Hamilton Health Sciences (HHS) or be a full member of the Department of Oncology at McMaster University.
Funding Details: Total Research Funds Available – $400,000
- Research Development Grants – Maximum Funding $50,000
- Thematic Research Grants – Maximum Funding $100,000
- Research Specific Topics
  - BRIGHT Run – $100,000 available in support of Breast Cancer Research
  - Kuhn Award in Memory of Jay Kuhn – $10,000 available in support of Hodgkin Disease or non-Hodgkin Lymphoma Research

Additional Details
Sponsor Deadline: October 23, 2017
*For Additional Information please contact Gwen Flynn, Donor Relations and Grant Associate at flynnw@hhsc.ca*

HHS Health Professional Investigator (HPI) Operating Grant
The HPI Operating Grant provides project funding to non-physician principal investigators (PI) who are HHS-employed healthcare professionals. Inter-professional teams, which include physicians, are encouraged, but physicians are not eligible to apply as lead PI for this grant. The HPI Operating Grant is for research initiatives directly relevant to the clinical mission and priorities of HHS (Patients, People, Sustainability, Innovation and Learning). The grant objective is to provide support for pilot studies or research projects that have the potential to lead to larger projects and the possibility of external funding. The HPI Operating Grant offers an opportunity to foster and support a culture of inquiry for early investigators under the mentorship of experienced researchers.

Funding Details: up to $15,000 per grant, three grants available for a one-year term.

Additional Details
Sponsor Deadline: October 28, 2017

Canadian Orthopaedic Foundation: Canadian Orthopaedic Research Legacy (CORL) Grant
In this proposal, applicants are expected to provide a systematic, logical description of the project or line of research, which demonstrates familiarity with the subject matter and a carefully formulated plan of implementation. The rationale, the project plan, the methods and procedures to be used, the mode of analysis to be employed should be clearly outlined. In general terms, the proposal describes the work, proceeding from general theoretical considerations to the specific project, culminating in a budget. The budget qualifies the work in terms of personnel, materials, services or other requirements.

Funding Details: Maximum $20,000 for one year.

Additional Details
Internal HRS Deadline: October 17, 2017
Sponsor Deadline: October 31, 2017

Canadian Orthopaedic Foundation: J. Edouard Samson Award
The premier award for orthopaedic research in Canada, the J. Edouard Samson Award, recognizes the best career orthopaedic research over a period of five (5) years or more at a Canadian centre. This $30,000 award is intended to promote further research by the recipient. The recipient will present his/her research at the Annual General Meeting of the Canadian Orthopaedic Association (presentation opportunity to be determined). The award consists of an educational grant and a personal research grant to be used by the recipient at the Canadian institution where he/she currently resides.

Funding Details: $30,000 award

Arts Research Board (ARB) Fall 2017 Grants Competition
Applications are now being accepted for the Arts Research Board (ARB) Fall 2017 Grants Competition.
The key objective of the ARB is to cultivate a strong research base among the Faculties of Humanities, Social Sciences and Business. Specifically, ARB supports:
• research programs of new faculty;
• new and/or collaborative, interdisciplinary and/or multidisciplinary research initiatives;
• ongoing research that has a budget less than the minimum required for SSHRC applications;
• research-related conference travel; and
• publication of peer-reviewed manuscripts

It is expected that funding will lead to increased individual and group participation and success in external grant competitions. Seed funding is the Board’s priority.

The following categories of grants are supported by ARB:

• Conference Attendance and Representational Activities
• Standard Research
• Creative and Performing Arts
• Scholarly Publications
• Major Collaborative Project Seed Grants

Funding Details:

• Conference Grant - $4,000
• Standard Research, Creative & Performing Arts, and Scholarly Publications Grants – Combined, $7,000
• Major Collaborative Project Seed Grant - $15,000

Juvenile Diabetes Research Foundation (JDRF) Beta Cell Replacement Innovative Grant

JDRF provides seed funding for highly innovative research with significant potential to accelerate the mission of JDRF. Proposals should address key outstanding questions and have the potential to lead to a change in the current paradigm or conventional wisdom and/or lead to a groundbreaking discovery. Preliminary data is not required in the proposal but the underlying premise, goal, or hypothesis must be plausible and testable and the proposal must be focused with a well-defined goal that is achievable within the timeframe of the award. Specific Information regarding JDRF’s Beta Cell Replacement research priority area can be found here.

Funding Details: Innovative grants provide one year of support for a maximum of USD 100,000 in direct costs and indirect costs of 10%, for a total of USD 110,000. These grants are not renewable. A final progress report is due within 75 days following the close of the award.

BioCanRx: Biotherapeutics for Cancer Treatment

The objective of the BioCanRx Open Call is to provide funding to translate promising biotherapeutic discoveries from the lab to the clinic, with a particular emphasis on Clinical Trials/Investigational New Drug enabling work to support clinical trial applications. Funding is available through the following Research Programs:

- Clinical Trials;
- Enabling Studies;
- Catalyst;
- Clinical, Social & Economic Impact

Funding Details:

- **Clinical Trials:** approximately $4 million over 5 years, BioCanRx will contribute to a maximum of 40% for the costs of a clinical trial;
- **Enabling Studies:** approx. $5.5 million over 5 years, BioCanRx will contribute to a maximum of 50%; Catalyst: approx. $3.5 million over 5 years. BioCanRx will contribute to a maximum of 50%;
- **Clinical, Social & Economic Impact:** approx. $1.5 million over 5 years, BioCanRx will contribute to a maximum of 50%.

**LOI Deadline:** November 1, 2017

Michael G. DeGroote Fellowship Awards

Awards are available in two categories: the Michael G. DeGroote Fellowship Award in Basic Biomedical Science and the Michael G. DeGroote Fellowship Award in Clinical Research. Candidates conducting basic science research are eligible for the Basic Biomedical Science Fellowship Award and those pursuing clinical research are eligible for the Clinical Research Fellowship Award. Applicants must identify in their application which award they are applying for. Separate selection committees will review the respective applicants for each award.

Funding Details: Each award provides non-renewable funding of $50,000 for one year for successful applicants. The funding is comprised of $40,000 from the Michael G. DeGroote Health Sciences Development Fund and $10,000 contributed by the applicant’s supervisor.

Epilepsy Canada – The Jay & Aiden Barker Breakthrough Grant in Clinical & Basic Sciences 2017

Epilepsy Canada (EC) is requesting research proposals from established researchers to conduct investigations that explore the basic mechanisms of epileptic seizures. They are looking for a widespread assortment of submissions. In particular, they’re interested in submissions that are high risk in nature that if successful would have near term applicability in the treatment of epilepsy and hopefully lead to finding a cure.

Epilepsy Canada is also receptive to receiving proposals that represent multi-year projects. They encourage high risk proposals that would develop preliminary data sufficient to make applications to other funding bodies that support more extensive programs. Applications having a more clinical focus are also encouraged but they should be experimental in nature and have clear hypothesis that potentially leads to better clinical outcomes.

This competition is open to all academic researchers (MD and/or PhD) holding a permanent appointment at a university research institute in Canada. Funds cannot be used to support the salary or buy out clinical time of the Principal Investigator as these grant monies are intended to support operational services.

Funding Details: Epilepsy Canada has set aside up to $200,000 to be awarded to a single winner, or apportioned to multiple award winners, by December 31, 2017.

**LOI Deadline:** October 16, 2017

**Internal HRS Deadline:** October 18, 2017

**Sponsor Deadline:** November 1, 2017
**Social Sciences and Humanities Research Council (SSHRC): Connection Grants**

Connection Grants support events and outreach activities geared toward short-term, targeted knowledge mobilization initiatives. These events and activities represent opportunities to exchange knowledge and to engage on research issues of value to those participating. Events and outreach activities funded by a Connection Grant may often serve as a first step toward more comprehensive and longer-term projects potentially eligible for funding through other SSHRC funding opportunities. Connection Grants proposals are expected to meet the objectives of the Connection program.

Connection Grants support workshops, colloquiums, conferences, forums, summer institutes or other events or outreach activities that facilitate:

- disciplinary and/or interdisciplinary exchanges in the humanities and social sciences;
- scholarly exchanges between those working in the social sciences and humanities and those working in other research fields;
- intersectoral exchanges between academic researchers in the humanities and social sciences and researchers and practitioners from the public, private and/or not-for-profit sectors; and/or
- international research collaboration and scholarly exchanges with researchers, students and non-academic partners from other countries.

**Funding Details:** $7,000 to $25,000 for events, and up to $50,000 for other outreach activities; higher amounts for outreach activities may be considered if well justified. Duration is 1 year.

**Draft Application and Letters of Support to ROADS:** October 17, 2017

**Sponsor Deadline:** November 1, 2017

*To Apply, Contact Pamela McIntyre, Senior Advisor, ROADS at mcintyp@mcmaster.ca extension 23713*

**Spencer Foundation: Small Research Grants and The New Civics**

Spencer has announced two funding opportunities: Small Research Grants and The New Civics.

The objective of the **Small Research Grant** is to support academic work that will contribute to the improvement of education, broadly conceived. **Areas of Inquiry:**

1) The Relation between Education and Social Opportunity;
2) Teaching, Learning, and Instructional Resources;
3) Organizational Learning in Schools, School Systems, and Higher Education Systems;
4) Purposes and Values of Education;
5) Field-Initiated.

The objective of **The New Civics** is to support proposals that ask critical questions, specifically, how education can more effectively contribute to the civic development of young people. The New Civics has supported projects that

- a) deepen the understanding of educational and other influences on civic action,
- b) attend to social inequalities in civic education,
- c) show potential to shape future research and practice in these fields.

**Funding Details:** $50,000 or less

**Additional Details**

**Internal HRS Deadline:** October 18, 2017

**Sponsor Deadline:** November 1, 2017

**2018 Alzheimer Society Research Program (ASRP) Competition**

The ASRP provides grants and awards to support Canadian studies that promise new insights into causes, prevention, diagnosis, treatment and management of Alzheimer’s disease and other dementias.

**Awards**

- **Doctoral Awards** provide an opportunity for promising individuals, pursuing a PhD, to begin the process of becoming future independent investigators in the field of Alzheimer’s disease and other dementias.
- **Postdoctoral Awards** are for graduates with a PhD or MD who wish to gain additional research experience within an established research environment.

**Grants**

- **New Investigator Grants** are designed to help launch the careers of outstanding researchers who are within the first 2 years of their initial academic appointment.
- **Regular Grants** are designed to fund established researchers.
Funding Details:
- **Doctoral Awards** - $22,000/year for 3 years
- **Post-Doctoral Awards** - $41,500/year (PhD) or $51,500/year (MD) for 2 years
- **New Investigator Grants** - $60,000/year (QoL) or $75,000/year (Biomedical) for 3 years
- **Research Grants** - $60,000/year (QoL) or $75,000/year (Biomedical) for 2 years

**Additional Details**

**Sponsor Deadline:** November 6, 2017

**Hamilton Academic Health Sciences Organization (HAHSO) AHSC AFP Innovation Fund**
The Provincial AHSC AFP Innovation Fund was established from new annual AHSC AFP funding under the Physician Services Agreement between the Ontario Medical Association (OMA) and the Ministry of Health and Long-Term Care (MOHLTC). This Innovation Fund is targeted to support: “the development of new and innovative practices in health care delivery, and to support leadership and the dissemination of knowledge across the healthcare system.”
The HAHSO Grant Adjudication Panel manages the application process and formulates recommendations regarding funding approval of Innovation Fund proposals to the HAHSO Board of Directors who in turn submit recommended projects to the Innovation Fund Provincial Oversight Committee. (IFPOC)

**Funding Details:** The maximum annual funding is limited to $100,000 and the maximum duration of the project is two years.

**Additional Details**
**Internal HRS Deadline:** October 24, 2017
**Sponsor Deadline:** November 7, 2017

**BrightFocus Foundation: National Glaucoma Research Program**
The objective of the National Glaucoma Research Program is to provide significant funding for researchers who have already generated some amount of preliminary data, but are often required to demonstrate additional, significant progress before they can apply to governmental or industrial funding agencies.

**Funding Details:** $150,000 over 2 years

**Additional Details**
**Internal HRS Deadline:** October 24, 2017
**Sponsor Deadline:** November 7, 2017

**Bill & Melinda Gates Foundation Grand Challenges Explorations**
Grand Challenges Explorations is an initiative where initial grants are for USD $100,000 and successful projects are eligible to receive follow-on funding of up to USD $1 million. Proposals are solicited twice a year for an expanding set of global health and development topics. Applications are only two pages, and no preliminary data is required. Applicants can be at any experience level; in any discipline; and from any organization, including colleges and universities, government laboratories, research institutions, non-profit organizations and for-profit companies.
The Bill & Melinda Gates Foundation is accepting applications on the following three topics:
- **Novel Approaches for Improving Timeliness of Routine Immunization Birthdose and Healthcare Worker Skill in Low-Resource Settings**;
- **Healthy Minds for Adolescent Mothers: Achieving Healthy Outcomes for the Family**;
- **Innovations for Integrated Diagnostics Systems**

**Funding Details:** Initial grants are for USD $100,000 and successful projects are eligible to receive follow-on funding of up to USD $1 million.

**Additional Details**
**Internal HRS Deadline:** October 25, 2017
**Sponsor Deadline:** November 8, 2017, 11:30 am Pacific Time
Mitacs Funding for Collaborative International Research

Mitacs is accepting applications for competitive international research opportunities, including student travel to and from Canada. The deadline to apply is November 8, 2017, at 5 p.m. PT.

Projects last 12–24 weeks and are open to graduate students in all disciplines. Select destinations are also open to senior undergraduates. Graduate students can also apply to the Mitacs-JSPS Summer Program, which supports travel to Japan for a 10-week research project in the summer of 2018.

Funding Details: Funding varies by destination

France-Canada Research Fund New Scientific Collaboration Support Program 2018

The New Scientific Collaboration Support Program, financed by the France-Canada Research Fund (FCRF), aims to accomplish the following objectives:

- Support developing new expert partnerships between France and Canada
- Promote the advancement of research and innovation
- Prepare and structure scientific cooperation between the two countries
- Promote researcher mobility, particularly for young researchers, and
- Provide research training for young researchers.

This program provides financing for new scientific projects jointly developed by French and Canadian teams that have never worked together before.

Funding Details: The grants range from $8,000 to $15,000 over 2 years.

Ontario Genomics: Genomic Applications Partnership Program (GAPP) Round 10

The Genomic Applications Partnership Program (GAPP) funds downstream research and development (R&D) projects that address real world opportunities and challenges identified by industry, government, not-for-profits and other “Receptors” of genomics knowledge and technologies. GAPP projects are collaborations between academic researchers and Receptor organizations. They are co-funded by Receptors and other stakeholders, and have the potential to generate significant social and/or economic benefits for Canada. The GAPP aims to:

- Accelerate the application of Canadian genomics-derived solutions to real-world opportunities and challenges defined by industry and public sector Receptors.
- Channel Canada’s genomics capacity into sustainable innovations that benefit Canadians.
- Enhance the value of Canadian genomics technologies by de-risking and incentivizing follow-on investment from industry and other partners.
- Foster mutually beneficial collaboration and knowledge exchange between Canadian academia and technology receptors.

Funding Details: From $300,000 to $6M for 1 to 3 years.

*Notify HRS of your intent to apply by sending an email to hsresadm@mcmaster.ca*
Fulbright Canada: Awards for Canadian Scholars

Fulbright Canada has announced the following Awards for Canadian Scholars:

1) **Canadian Traditional Scholar Awards**, the objective:
   1) To support Canadian scholars in all disciplines,
   2) To enable emerging and established scholars, post-doctoral researchers and experienced professionals to conduct research, teach, or undertake a combination of both activities at any university or research center of their choice, in the United States. Fulbright Canada is particularly interested in encouraging research on contemporary issues relevant to Canada, the United States, and the relationship between the two countries.([http://www.fulbright.ca/programs/canadian-scholars/traditional-awards.html](http://www.fulbright.ca/programs/canadian-scholars/traditional-awards.html))

2) **Canadian Visiting Research Chairs**: are pre-arranged affiliations that allow scholars to conduct research/lecture on subjects important to that university. Fulbright Visiting Research Chairs may guest lecture in university courses, mentor students, lecture in public venues, network and promote their research while representing the Fulbright program, their home and host institutions.([http://www.fulbright.ca/programs/canadian-scholars/visiting-chairs-program.html](http://www.fulbright.ca/programs/canadian-scholars/visiting-chairs-program.html))

**Funding Details:**
- **Canadian Traditional Scholar Awards**: The award is valued at $12,500 USD for 1 semester (4 months)
- **Canadian Visiting Research Chairs**: The award is valued at $25,000 USD for 1 semester (4 months)

Both awards begin in either September 2018 or January 2019.

**Additional Details**

**Internal HRS Deadline**: November 1, 2017  
**Sponsor Deadline**: November 15, 2017

**HHS Research Early Career Awards**

The Hamilton Health Sciences Research Early Career Awards (ECA) are research personnel stipends awarded annually. These Early Career Awards are to be used to help the applicant pursue research in their specialty area through either purchasing a portion of time for the applicant’s salary OR a portion of time for salaries of research personnel who are supervised by the applicant. Candidates must be staff members of Hamilton Health Sciences, or members of HHS research institutes, and must hold a faculty appointment.

**Funding Details**: up to $50,000 annually, for up to 3 years.

**Additional Details**

**Sponsor Deadline**: November 15, 2017

**Canadian Hemophilia Society (CHS): Grants**

The CHS has recently announced the following funding opportunities:

1) **CHS Dream of a Cure Research Program** – Supporting research towards improving the health and the quality of life of all people with inherited bleeding disorders.
2) **The CHS/Pfizer Care Until Cure Research Program** – This program allows Canadian investigators to conduct research on medical and psychosocial aspects of bleeding disorders, including outcome evaluation. Grants are awarded for clinical research in fields relevant to improving the quality of life for persons with hemophilia, persons with von Willebrands disease or other inherited bleeding disorders, persons with related conditions such as HIV or hepatitis C, and carriers of an inherited bleeding disorder.
3) **CHS – Novo Nordisk Psychosocial Research Program** – The program was created to engage professionals/graduate students from the allied health disciplines (i.e. Nursing, Physiotherapy & Social Work) in research activities addressed to understanding the psychosocial impact of hemophilia and other inherited bleeding disorders and to improve the quality of life of persons and families whose lives are affected by these disorders.

**Funding Details:**
- **Dream of a Cure** – $75,000 per year per project to a maximum of $150,000 which can be expended over 2 or 4 years.
- **The CHS/Pfizer Care Until Cure** – $75,000 per year per project to a maximum $150,000 which can be expended over 2 or 3 years.
- **CHS – Novo Nordisk Psychosocial Research** - $20,000 - $40,000 for 1 year
Canadian Blood Services (CBS): Graduate Fellowship Program
The Canadian Blood Services Graduate Fellowship Program provides stipend support for young investigators who want to initiate or continue training in the field of transfusion science. Graduate students undertaking full-time research training in a Canadian institution are invited to apply.

Funding Details: The fellowship has a value of $25,000 per annum with an additional travel allowance of $1,000 per year of support. Students may be supported for a maximum of four years, with a requirement for successful renewal half way through the fellowship.

Council of Ontario Universities (COU): The Ontario Women’s Health Scholars Awards 2018-2019
The Ontario Women’s Health Scholars Awards Program was established with the support of the Ministry of Health and Long-Term Care to ensure that Ontario attracts and retains pre-eminent scholars studying women’s health. The Ontario Women’s Health Scholars Awards Program aims to establish a research community that meets or exceeds internationally accepted standards of scientific excellence in its creation of new knowledge about women’s health and its translation into improved health for women, more effective health services and products for women, and a strengthened health care system.

Funding Details: For 2018-19, the program offers up to:
- three renewable one-year awards of $25,000 (plus a research allowance of $1,000) at the master’s level;
- three renewable one-year awards of $35,000 (plus a research allowance of $2,000) at the doctoral level; and
- two renewable one-year awards of $50,000 (plus a research allowance of $5,000) at the postdoctoral level.

European Respiratory Society (ERS) Marie Curie Post-doctoral Research Fellowships (RESPIRE 3)
This project has received funding from the European Union's Horizon 2020 research and innovation programme under the Marie Skłodowska-Curie grant agreement No 713406.
RESPIRE3 is an international, inter-sectoral and inter-disciplinary programme providing Marie Skłodowska-Curie post-doctoral research fellowships to early stage scientists with the potential to become the leaders of tomorrow in the respiratory field. It is co-funded by the European Union (EU) and builds on the success of the previous RESPIRE1 and RESPIRE2 programmes.
Fellowship candidates can choose between two options, both offering attractive working conditions and a strong focus on career development:
- 2-year European Fellowships - open to candidates of any nationality to come to or move within Europe
- 3-year Global Fellowships - also now on offer

Funding Details: The ERS RESPIRE3 grant covers the following allowances (full-time rates), covered through ERS/EU co-funding:
- Living Allowance €56’400.
- Mobility allowance €14’600.- for moving to a new country & career development
- Family allowance (only if applicable) €6’000.-
Orthopaedic Trauma Association: Resident Grant
The principal investigator must be an orthopaedic resident (the co-principal investigator does NOT have to be a resident). Either the principal investigator, or co-principal investigator, must be an OTA member (in good standing). The research must be conducted in North America. OTA Resident Grants will not be awarded to subsidize larger on-going research projects.

Funding Details: Resident Grants up to $20,000 are available for clinical research or basic research projects.

Additional Details
Internal HRS Deadline: November 20, 2017
Sponsor Deadline: December 4, 2017

OMeGA 2018-2019 Fellowship Grant
OMeGA is now accepting fellowship applications for the 2018-2019 academic years. Grants support clinical orthopaedic fellowship programs and may be used for a fellow’s salary and benefits. (Programs can request preapproval of other direct educational expenses if salary and benefit support is not possible.) Applications are scored individually and ranked in comparison to other subspecialty applicants. Awards are determined by available funding each academic year, which varies by subspecialty.

Funding Details: Up to $75,000

Additional Details
Internal HRS Deadline: November 21, 2017
Sponsor Deadline: December 5, 2017

Canadian Association for Medical Education (CAME) Wooster Family Grant in Medical Education
Opportunities for peer-reviewed grant support in medical education are limited. Emerging educators and those with new unfunded projects are particularly challenged in attracting support at these critical times. This award is meant to support new and innovative projects in medical education that are not part of a larger, formalized and funded education research program.

Eligibility: Clinical faculty members* in a Canadian faculty of health sciences/medicine (or equivalent), who are members of CAME, seeking funding for scholarly projects related to medical education.

Funding Details: Funding will be awarded annually to one or more applicants at the discretion of the awards committee. A maximum of $10,000 per project will be awarded. The number of projects funded will depend on the number and scope of eligible projects in a given year. The committee reserves the right to not fund any projects in any given year.

Additional Details
LOI Deadline: October 20, 2017
Internal HRS Deadline: December 15, 2017
Sponsor Deadline: January 5, 2018

Cancer Research Institute: Clinic & Laboratory Integration Program (CLIP) Grant
CLIP Grants provide funding for qualified scientists who are working to explore clinically relevant questions aimed at improving the effectiveness of cancer immunotherapies. The grant will support basic, pre-clinical, and translational research, which will provide information that can be directly applied to optimizing cancer immunotherapy in the clinic.

Candidates for a CLIP Grant must hold a faculty appointment as a tenure-track assistant professor (or higher rank) at the time of award activation. CRI has no citizenship restrictions, and research supported by the award may be conducted at medical schools and research centers in the United States or abroad. Please note that CLIP Grants do not support research at for-profit institutions.

Funding Details: CLIP Grants provide up to $100,000 per year for two years.

Internal HRS Deadline: January 18, 2017
Sponsor Deadline: February 1, 2018 (By Invite Only)
Simons Foundation (SFARI): Pilot and Research Awards

SFARI Pilot Award
This application type is for innovative, high-impact proposals requesting support for small-scale projects or early-stage experiments that will build on preliminary data or a prior track record and lead to competitive applications for funding by SFARI or other organizations. Investigators new to the field of autism are encouraged to apply for Pilot Awards. The total maximum award amount is $330,000, including indirect costs, for two years. Budgets for individual years can vary as long as the budget over two years does not exceed the maximum total award amount. Please note that SSC and Simons VIP biospecimen costs are not included in the maximum budget.

SFARI Research Award
This application type is for competitive proposals from investigators with demonstrated expertise requesting support for compelling, high-impact research on experimental hypotheses for which, in most cases, preliminary data have already been gathered. The foundation will also consider projects focusing on a central hypothesis where success depends on close collaboration between two or more labs. We expect to fund proposals for a maximum total award amount of $975,000, including indirect costs, for three years, but under exceptional circumstances we will consider proposals with budgets of up to $1,200,000, including indirect costs, for three years if justified in the budget. (This grant mechanism is not intended to support large, randomized clinical trials of medications.) We strongly encourage PIs considering such studies to discuss their proposals and budgets with SFARI science staff before submission (please contact scienceRFA@simonsfoundation.org). Proposals with unusually high budgets are subject to heightened scrutiny. Please note that SSC and Simons VIP biospecimen costs are not included in the maximum budget.

Funding Details:
- Pilot Award: Up to $330,000 for up to 2 years.
- Research Award: Up to $975,000 for 3 years.

Additional Details
LOI deadline: December 1, 2017
Internal HRS Deadline: February 12, 2018
Sponsor Deadline (By invite only): February 26, 2018

Patient-Centered Outcomes Research Institute (PCORI) Pragmatic Clinical Studies to Evaluate Patient-Centered Outcomes – Cycle 3 2017
The Patient-Centered Outcomes Research Institute (PCORI) will be releasing a new funding announcement titled, “Pragmatic Clinical Studies to Evaluate Patient-Centered Outcomes.” The goal of this announcement is to fund pragmatic clinical trials, large simple trials, or large-scale observational studies that compare the relative effectiveness of two or more alternatives for improving patient-centered outcomes. While any study that addresses critical choices faced by patients, their caregivers, clinicians, and/or delivery systems will be considered, PCORI’s multi-stakeholder panels have identified 16 high-priority topics and research questions. PCORI will give first consideration to applications that directly address one or more of the 16 PCORI Priority Topics. Please note that for this cycle, PCORI has added a priority topic on Anxiety Disorders in Children, Adolescents, and/or Young Adults to the list. PCORI has funds available up to $90 million for studies in response to the current cycle of the PCS funding announcement, including any studies for the PCORI priority topics. The mission of the Patient-Centered Outcomes Research Institute (PCORI) is to improve the quality and relevance of evidence available to help patients, caregivers, clinicians, employers, insurers, and policy makers make informed health decisions. We invite you to review this new funding announcement and share this information with others who may be interested. The funding announcement will be released on October 3, 2017.

Funding Details: Funds available up to $90 Million. $10 Million Total Direct Costs for up to 5 years.

Additional Details
LOI Deadline: October 31, 2017
Internal HRS Deadline: January 23, 2018
Sponsor Deadline: February 6, 2018
**Weston Brain Institute: Transformational Research Canada 2018 Neurodegenerative Diseases of Aging**

The Weston Brain Institute is delighted to launch their Transformational Research: Canada 2018 Program to fund transformative, novel, high-risk, high-reward translational research projects with excellent preliminary data. Their goal is to provide funding for translational research that will accelerate the development of therapeutics for neurodegenerative diseases of aging. Eligible Principal Applicants must be researchers working in Canada at least 30% of the time at or above the level of Assistant Professor or equivalent, and be affiliated with a Canada Revenue Agency-qualified donee institution located in Canada. Co-Applicants/Collaborators must be at the post-doctoral level or above and can be working outside Canada. The Weston Brain Institute will be holding an online Program Information Webinar for this funding opportunity on Wednesday, October 25th at 1:00 pm EDT. This session is intended to provide you with comprehensive information on the application process and to provide an opportunity for open questions. Register Here

**Funding Details:** A maximum of $1,500,000 over up to 3 years per project

**Additional Details**
- **LOI deadline:** December 7, 2017
- **Sponsor Deadline (By invite only):** March 2018

**Natural Sciences and Engineering Research Council of Canada (NSERC) Belmont Forum-BiodivERsA: 2017-2018 Joint Call: Scenarios of Biodiversity and Ecosystem Services**

NSERC is participating in the Belmont Forum and BiodivERsA joint call on the following theme: *Scenarios of biodiversity and ecosystem services.*

The call will address the two following major (non-exclusive) priorities:
- Development and application of scenarios of biodiversity and ecosystem services across spatial scales of relevance to multiple types of decisions;
- Consideration of multiple dimensions of biodiversity and ecosystem services in biodiversity scenarios.

The call aims at supporting proposals that explicitly address a scenario dimension, taking into account the following definition of scenarios: *“Scenarios of biodiversity and ecosystem services are the outputs of the combination of scenarios of indirect drivers and direct drivers — such as land use change, invasive alien species, overexploitation, climate change or pollution — and models of impacts of these drivers on biodiversity and ecosystem services.”*

Twenty-five funding organizations from 23 countries are joining this call: Argentina, Austria, Belgium, Brazil (State of Sao Paulo only), Bulgaria, Canada, Estonia, Finland, France, Germany, Ireland, Ivory Coast, Lithuania, The Netherlands, Norway, Poland, Romania, Slovakia, Spain, Sweden, Switzerland, Turkey, United States of America. Scientific teams are invited to form international consortia comprising research groups from at least three countries participating in the call.

**Funding Details:** The approximate global budget for this call is more than 25 million euros ($37 million CDN). NSERC’s contribution will be up to $300,000 per year for 3 years, with a maximum of $75,000 per year per project.

**Additional Details**
- **LOI to ROADS:** November 13, 2017
- **Mandatory Pre-Registration Deadline:** December 1, 2017
- **Draft Application to ROADS:** February 7, 2018
- **Final Application to ROADS:** March 1, 2018
- **Sponsor Deadline:** March 9, 2018

*To Apply, Contact Nathan Coschi, Senior Advisor, ROADS at coschimn@mcmaster.ca extension 21581*

**Cancer Research Institute: Technology Impact Award**

The Cancer Research Institute Technology Impact Award provides seed funding to address the gap between technology development and clinical application of cancer immunotherapies. These grants aim to encourage collaboration between technology developers and clinical cancer immunologists and to generate the proof-of-principle of a novel platform technology in bioinformatics, ex vivo or in silico modeling systems, immunological or tumor profiling instrumentation, methods, reagents and assays, or other relevant technologies that can enable clinician scientists to generate deeper insights into the mechanisms of action of effective or ineffective cancer immunotherapies.
Award winners will be selected based on the novelty, creativity, technical sophistication, and transformative potential of the technology to impact cancer immunotherapy research around the world. The ultimate aim of this program is to advance technologies that can speed up the entire field’s efforts in addressing one of the most defining challenges of our time—developing immunotherapies that are effective for all cancer patients.

**Funding Details:** The Cancer Research Institute Technology Impact Award provides seed funding of up to $200,000 to be used over 12-24 months

**Additional Details**

**LOI Deadline:** November 15, 2017  
**Internal HRS Deadline:** March 1, 2018  
**Sponsor Deadline:** March 15, 2018 (by invite only)

---

**Brain Canada Foundation – Parkinson Canada Platform Grant**

The Platform Grant is intended to support the development and maintenance of a large-scale Canadian Parkinson Network and Registry that is built on the foundation of the established and successful FRQS Quebec Parkinson Network, involving multiple provinces, in the field of Parkinson’s disease and related disorders, as well as its operating costs, for a period of three years. The platform will have to provide added value to the Canadian Parkinson research. Brain Canada and Parkinson Canada will not prescribe any approaches, but wish for the applicants to answer three questions:

- How can Canada become a leader in Parkinson’s research?
- What can be learned and implemented from models in other countries?
- How can nationwide collaborations in the field of Parkinson’s disease research be made more efficient?

**Funding Details:** The total amount available to support the platform grant is CDN $2,000,000.

**Additional Details**

**LOI Deadline:** November 13, 2017  
**Internal HRS Deadline:** March 16, 2018  
**Sponsor Deadline:** March 30, 2018 (by invite only)

**MITACS Accelerate Internship Opportunities**

Five United Ways across Canada have come together in a pilot partnership with Mitacs to provide funding and training for graduate students and postdocs for research related to social inclusion. Social Inclusion as an issue is of broad interest to United Way’s across Canada and the United Way movement worldwide. Inclusion is a strategy to leverage diversity. Diversity always exists in social systems. Inclusion, on the other hand, must be created. In order to leverage diversity, an environment must be created where people feel supported, listened to and able to do their personal best. Social inclusion (sometimes referred to as a sense of belonging) is the act of making all groups of people within a society feel valued and important. It is the process of improving the terms on which individuals and groups take part in society—improving the ability, opportunity, and dignity of those disadvantaged on the basis of their identity.

**Funding Details:** Get a stipend/salary starting at $10,000 per four-month period

**Additional Details**

**LOI Deadline:** January 8, 2017  
**Internal HRS Deadline:** March 18, 2018  
**Sponsor Deadline:** April 1, 2018

**Weston Brain Institute Rapid Response: Canada 2018 Parkinson’s & Related Diseases – Round 1**

Seed funding for novel, high-risk, high-reward translational research to accelerate the development of safe and effective treatments for neurodegenerative diseases of aging. Principal applicants must be at or above the level of postdoctoral researcher at a CRA qualified institution located in Canada. Project must involve the development of a therapeutic, and/or a tool to help accelerate the development of therapeutics for neurodegenerative diseases of aging.

**Program Information Session:** October 10, 2017 at 1pm EDT (Register here)

**Funding Details:** Maximum $200,000 over up to 18 mos.
**2019 Networks of Centres of Excellence Competition**

The Networks of Centres of Excellence (NCE) is pleased to announce the launch of a competition for NCE networks. The funding available is $75 million over five years. Approximately 40% of the budget will be allocated to fund new networks that meet the threshold of excellence in all criteria. While it is anticipated that at least 40% of the budget will fund new networks, no portion of the budget will be specifically reserved for either new or established networks. As in all NCE competitions, funds will be allocated to the most meritorious applications that meet the threshold of excellence in all criteria.

Networks must be challenge-focused and solution-driven. They are expected to foster innovative research, training and the co-creation of new knowledge on critical issues of intellectual, social, economic and cultural significance. They must engage partners in the design and execution of all network activities, including knowledge creation, mobilization and exploitation. Both new and established networks are eligible to apply for funding in this competition. Established networks are defined as NCE networks that have been awarded NCE funds for all available funding cycles and whose final NCE funding term has ended or will end by March 2019.

Networks are expected to promote equity, diversity and inclusion within the structure of the proposed network and its activities.

**Funding Details:** The total budget for this competition is currently set at $75M over 5 years ($15M/year). Approximately 40% of this budget will be allocated to fund new networks that meet the threshold of excellence.

---

**MITACS Globalink Research Award – Special Opportunity**

The Mitacs Globalink Research Award supports international research collaboration. Special research funding is available for graduate students with uncertain status in their current location, to conduct research at a Canadian university.

**Funding Details:**
- $5,000 award from Mitacs to support student travel and accommodation expenses, research-related expenses, and student stipend
- 12-24 week project at a Canadian university Supervised by Canadian faculty
- Applications are accepted at any time and will be processed as received.

---

**Canadian Institute for Advanced Research (CIFAR), Call for Proposals: International & Interdisciplinary Research Workshops – Open Call**

CIFAR is announcing the launch of a new opportunity to explore key questions of global importance that can best be addressed through interdisciplinary, international teams. We have designed a research workshop program for short-term, time-limited interactions of 10 to 20 people.

**Funding Details:** A high-level budget is required for up to a maximum of $50,000 CAD
Simons Foundation, Simons Foundation Autism Research Initiative (SFARI): SFARI Explorer Award
This award program is designed to enhance our existing support of autism research by providing timely resources to enable focused experiments highly relevant to our mission. A deeper understanding of the mechanisms underlying autism spectrum disorders or potential therapeutic approaches will require investigation at multiple levels, including but not limited to studies focused on gene discovery, molecular mechanisms, circuits, anatomy, and cognition and behavior. We will consider proposals at all of these levels.

Funding Details: SFARI will support applications for maximum of $70,000, including indirect costs, for one year, non-renewable.

Additional Details
Sponsor Deadline: Ongoing

Department of Defense Hearing Restoration Research Program (HRRP) Funding Opportunities for Fiscal Year 2017
2 Awards are now available.
- Translational Research Award – Supports preclinical translational research that will accelerate the movement of promising initiatives relevant to hearing restoration into clinical applications. In the first year of the program, applications submitted must focus on the development of reliable in vitro human models to evaluate hearing restoration therapies or research that translates biological regeneration initiatives into therapies that restore auditory function.
- Focused Research Award – Supports functional hearing restoration research that develops and validates assessment techniques and treatment methods using patient-centric outcomes to identify potential predictive indicators for successful treatment of functional auditory system deficits.

Funding Details:
- Translational Research Award – Maximum funding of $1,000,000 for direct and indirect costs for a maximum of 3 years
- Focused Research Award – Maximum funding of $750,000 for direct and indirect costs for a maximum of 3 years

Additional Details
LOI Deadline: October 25, 2017 (A pre-application is required and must be submitted through eBRAP)
Internal HRS Deadline: November 1, 2017
Sponsor Deadline: November 15, 2017

Department of Defense Reconstructive Transplant Research Program (RTRP) Funding Opportunities for Fiscal Year 2017- Concept Award
The RTRP Concept Award supports the exploration of a highly innovative new concept or untested theory relevant to reconstructive transplantation. Applications must address at least one of the FY17 RTRP Focus Areas:
- Immune system regulation as specifically applied to vascular composite allotransplantation (VCA)
- Psychosocial considerations and challenges associated with VCA
- Development of ex vivo VCA tissue preservation strategies to extend the time between procurement and transplantation, with a goal of 24 hours
- Development of pre-habilitation or rehabilitation strategies that improve reconstructive transplant functional outcomes
- Development of standardized quantitative functional outcome measures for VCA, especially for face transplant
- Graft clinical monitoring, acute and chronic, as applied to VCA

Funding Details: Maximum Funding of $200,000 for total costs for a maximum of 18 mos.

Additional Details
LOI Deadline: November 15, 2017 (A pre-application is required and must be submitted through eBRAP)
Internal HRS Deadline: November 22, 2017
Sponsor Deadline: December 6, 2017
Department of Defense Breast Cancer Research Program (BCRP) Funding Opportunities for Fiscal Year 2017

Three new awards are available. Please refer to additional details link for more information from the DoD website. Please see below for detailed deadlines.

Funding Details:

- **Era of Hope Scholar Award II** – Maximum funding of $2.5M for direct and indirect costs for a maximum of 4 years.
- **Breakthrough Award Levels 1 and 2 II**:
  - Funding Level 1 - Maximum funding of $375,000 for direct and indirect costs for a maximum of 3 years
  - Funding Level 1 with Partnering PI Option – Maximum funding of $600,000 for direct and indirect costs for a maximum of 3 years.
  - Funding Level 2 – Maximum funding of $750,000 for direct and indirect costs for a maximum of 3 years.
  - Funding Level 2 with Partnering PI Option – Maximum funding of $1M for direct and indirect costs for a maximum of 3 years.
- **Breakthrough Fellowship Award II** – Maximum funding of $300,000 for direct and indirect costs for a maximum of 3 years.

**Additional Details**

**LOI Deadline:** November 21, 2017 (A pre-application is required and must be submitted through eBRAP)

**Internal HRS Deadline:** November 24, 2017

**Sponsor Deadline:** December 6, 2017

Department of Defense Psychological Health/Traumatic Brain Injury Research Program (PH/TBIRP) Funding Opportunities for Fiscal Year 2017/2018

Two new awards are available. Please refer to additional details link for more information from the DoD website.

Funding Details:

- **Complex Traumatic Brain Injury Rehabilitation Research – Clinical Research Award (CTRR – CRA)** – Maximum Funding of $2M direct and indirect costs for a maximum of 4 years.
- **Complex Traumatic Brain Injury Rehabilitation Research – Clinical Trial Award (CTRR – CTA)**
  - Vestibular Rehabilitation Focus Area - Maximum Funding of $2.5M for direct and indirect costs for a maximum of 4 years.
  - Cognitive Rehabilitation Focus Area – Maximum funding of $4M for direct and indirect costs for a maximum of 4 years.

**Additional Details**

**LOI Deadline:** October 11, 2017 (A pre-application is required and must be submitted through eBRAP)

**Internal HRS Deadline:** December 13, 2017

**Sponsor Deadline:** December 27, 2017

Department of Defense Orthotics and Prosthetics Outcomes Research Program (OPORP) Funding Opportunities for Fiscal Year 2017

The Orthotics and Prosthetics Outcomes Research Award (OORA) supports research that evaluates the comparative effectiveness of orthotic and prosthetic clinical interventions using patient-centric outcomes for Service members and Veterans who have undergone limb amputation. Proposed projects should be designed to provide outcomes data regarding orthotic and prosthetic devices, and must include the anticipated effect on patient care metrics.

**Funding Details:** Orthotics and Prosthetics Outcomes Research Award (OORA)

- **Funding Level 1** - Maximum funding of $500,000 for direct and indirect costs for a maximum of 3 years.
- **Funding Level 2** - Maximum funding of $2,500,000 for direct and indirect costs for a maximum of 4 years.

**Additional Details**

**LOI Deadline:** October 20, 2017 (A pre-application is required and must be submitted through eBRAP)

**Internal HRS Deadline:** December 18, 2017

**Sponsor Deadline:** January 8, 2018
**Department of Defense Medical Simulation and Information Sciences Research Program (MSISRP)**

**Funding Opportunities for Fiscal Year 2017**

This Opportunity seeks to support basic research that dramatically advances the state of the art in civilian and military trauma care at the first responder point of care, during prolonged field care of combat casualties, and extended enroute care that can potentially be mitigated by leveraging novel ideas and designs that are yet to be invented in soft robotic, semiautonomous and autonomous concepts and systems for hemorrhage control, resuscitation, vascular and surgical control of combat casualties, and transport for critical care patients in unmanned vehicles.

**Funding Details:** Maximum Funding of $1,300,000 for direct and indirect costs for a maximum of 2 years

**Additional Details**

- **LOI Deadline:** November 20, 2017 (A pre-application is required and must be submitted through eBRAP)
- **Internal HRS Deadline:** January 22, 2018
- **Sponsor Deadline:** February 5, 2018
